Martha,
Sorry the call was over before I saw this, but to my knowledge HQ are currently having these discussions. It is not something I would have brought up on a National call like the FFLC though.
Thanks,
Glenn

I was about 10 minutes late, so I don't want to pop into the discussion, BUT I'm wondering whether the region is discussing raising the problematic ORR dispute Administrator Decision in response to President Biden's Executive Order.

Are you all having a discussion about this?

making. It is, therefore, the policy of my Administration to listen to the science; to improve public health and protect our environment; to ensure access to clean air and water; to limit exposure to dangerous chemicals and pesticides; to hold polluters accountable, including those who disproportionately harm communities of color and low-income communities; to reduce greenhouse gas emissions; to bolster resilience to the impacts of climate change; to restore and expand our national treasures and monuments; and to prioritize both environmental justice and the creation of the well-paying union jobs necessary to deliver on these goals.

To that end, this order directs all executive departments and agencies (agencies) to immediately review and, as appropriate and consistent with applicable law, take action to address the promulgation of Federal regulations and other actions during the last 4 years that conflict with these important national objectives, and to immediately commence work to confront the climate crisis.
